2019 Stella Tracking Information for the SCORE Baja 500

SCORE International and Anube Sport America will continue to be partnered for use of Anube tracking and safety devices for the 2019 season. Effective with the 2019 Baja 500 all teams need to run the Stella III EVO system. For those teams that have previously run the Stella III system you will need to transition from the Stella III to the Stella III EVO system before the Baja 500. This does require an upgrade to the Stella III's power cords and antennas. Refer below for additional information.

If you are new to SCORE you will need to order the Installation Kit Stella EVO for either bikes or Cars

New SPICA Device - We will be continuing the use of an additional device called the SPICA (pronounced SPEAK-Ah). This SPICA unit was added at the San Felipe 250 and will continue for all races. It does not require any equipment be purchase by the teams. The SPICA unit serves as a data logger and an additional option to request assistance during a medical emergency. The SPICA unit will be provided to each team at the start line of the race. Four (4) wheel vehicle teams will be provided information at the drivers meeting regarding required placement of the SPICA unit in the vehicle. However, there is a pouch available from Anube for $10 if you want to protect the device or secure within your vehicle.

Motorcycle and Quad Riders - You will be required to carry the SPICA unit on your person and pass the unit from rider to rider. This is in case you are separated from your moto/quad, you will have the unit on your person and will be able to request assistance from the SPICA unit. Refer to the Racer Brief regarding penalties for failing to transfer the unit between riders.

Phasing-In Stella III EVO devices for all classes – If you were in one of the classes using the Stella III EVO at the San Felipe 250 you do not have to do anything at this time. All other classes plus anyone in TT, TT Spec or Class 1 that did not run the San Felipe 250 will need to upgrade your devices prior to the Baja 500. Transitioning from the Stella III to the Stella III EVO system does require an upgrade to the Stella III's power cords and antennas. The cost of the upgrade is $50 plus shipping. To order the power cord/antenna kit or a new assembly kit go to:

https://usa.anubesport.com/product-category/score-international

All units must be ordered by May 15th to have them delivered the week of May 20th. If you miss the order date, there will be units available for purchase at pre-tech on Thursday May 23th in the downtown Ensenada area. You must have the units purchased and installed prior to getting in the Tech/Contingency lane on Friday May 24th.

Note to Race Teams: Make sure you review the Baja 500 Racer Brief to be published May 16th for important information on the Stella units and penalty information. Information regarding the use of Stella III EVO units is currently available on the SCORE website at Race Info/SCORE Tracking.

Anube Device Insurance – Race teams are responsible for any damage or loss of the Stella III EVO, and the SPICA units. To cover damage or loss during the race event, you will purchase the insurance directly from Anube during Tech/Contingency days. The cost is $40 payable directly to Anube.

New Anube Pre-Run Service - Stella units for pre-running are now available for lease from Anube. The unit provides the race course and includes tracking for chassis teams and family. The lease of the Stella for pre-running can be ordered on-line at https://usa.anubesport.com/product-category/score-international. The units will ship the second week of May and will be activated with the course route on May 18th.

All inquiries or questions regarding any Anube products or services contact them directly via their website at http://america.anubesport.com/ select CONTACT or send an email to mail@anubesport.com or info@anube.es.
