Continuing New Timing Technology for the Baja 1000

The SCORE Timing Team has completed the implementation of an updated timing system . This newer system utilizes smaller, more compact and technically advanced *SPORT-TAG*® transponders. This new physical design makes for easier placement and will provide additional tracking capabilities in the future.

While we went live at the Baja 400 for all classes, all racers must have the newer technology for the 2023 Baja 1000. We will no longer continue to use the "earlier" style black or blue transponder at SCORE races.

Any team that did not purchase one of the new transponders previously at the Baja 500 or Baja 400, and anyone that has not raced prior to this Baja 1000 will be required to purchase the new transponder for $100 upon registering for the Baja 1000, The transponders will be provided during registration in La Paz. If you have purchased the new transponder from another racing organization you may use it as they will work with our system.

Install the new transponder on your vehicle and please <u>remove</u> the old black or blue transponders you have been using before proceeding to the Tech/Contingency area on Friday.

The cost for this upgraded unit will remain at $100.00. It will zip tie on to your vehicle "A" pillar or front cowl area.
