Introducing Our New Timing and Scoring System

Bulletin #5

SCORE is announcing that Live Time has come on board as the timing and scoring services provider for the Baja 500 event. This process will provide SCORE with the ability to implement a real-time Leader Board and unofficial results. The SCORE Live Stream broadcast will include a real time on-screen timing ticker crawl as well as hourly timing and scoring updated brought to you by Optima Batteries.

To take advantage of the new relationship, SCORE will be implementing the use of transponders provided by Live Time and discontinuing the use of all models of transponders used in the past by SCORE.

Both organizations are committed to work together in the future to include transponder rental fees into the race entry fees. However, for this one race there will be an $80 rental fee for the device and a $200 deposit required.

Teams who requested a new transponder when you registered will receive a $100 refund. To obtain this refund, you or your representative MUST go to on-site Registration, you will receive an envelope containing your refund.

If your team took advantage of notarized waivers, someone MUST come to pick up your race packet, they must also pay for the transponder rental and make arrangement for the deposit. Deposits should be made by credit or debit card. When you turn in the transponder at the end of the race, you will be refunded $200. Additional refund policy in Transponder Mounting Instructions.

After completing your SCORE Registration, go to the Live Time table to complete paperwork, pay fees and deposit, and obtain transponder(s).

Placement of the transponder for this new adventure is critical. Refer to the link provided below or go to Score-international.com/Race Info/New Timing and Scoring System and print the placement documentation. The transponders must be on the vehicle prior to any vehicle qualifying or for non-qualifying classes Tech Day.

For Qualifying classes, you must have one transponder for qualifying and a separate one for race day. Place the device for Qualifying on the front bumper. Live Time will have staff at qualifying to remove the qualifying device. You are responsible for installing the second device before going to Tech on Friday.

When you finish the race, Live Time personnel will remove the transponder. Do not leave the start finish area until you have turned in the device. If you paid cash for the deposit, a process is being developed to return your deposit.

Transponders must be turned in at completion of event. If not turned in after the race, shipping information will be available to return units.

For questions contact the SCORE Ensenada office at 646-120-5635. From the US dial 011 52 before this number.
