Looking at SCORE in 2025

As our sport continues to expand, there is need for further emphasis on the safety of racers and spectators at events. New procedures in the area of safety, along with new registration and live streaming requirements are now in place for 2025.

TECH/CONTINGENCY DAY(S) CHANGES

Effective immediately, all vehicles entering the SCORE designated area must be operated by two registered race participants. They must remain in the vehicle at all times, Additional registered participants and team members can no long enter the area or bring a vehicle through the line. All other persons must remain outside of the designated area.

We highly recommend for each 4-Wheel vehicle that the DOR/ROR operate the vehicle through Tech/Contingency. However, we will allow two co-drivers/co-riders to bring a vehicle through but no navigators will be allowed in the area. A DOR/ROR must ensure the person bringing a vehicle through has the skill set to do so safely and with respect for other teams.

Moto's/Quads may only have two banded team members in the restricted area and the moto/quad must be ridden through the line. Only one person can be on the moto/quad. The second person can walk along with the vehicle.

For helmet and safety equipment checks, there will be a designated gate near the Tech area for equipment checks. You can either hand equipment over the fence or enter the area via the gate to have all team items checked.

REMINDER:.. At each event, all safety equipment for each participant must be checked on Tech/Contingency Day. If you are involved in an accident and do not have the safety stickers on your equipment, SCORE is not responsible. You are participating at your own risk.

RACER ONSITE REGISTRATION DEADLINE

For all future races the process of late registrations (walk-ins) will have a revised cut-off day and time. In the past your team could walk-in and pay fees up until 4pm on Tech/Contingency Day. Effective immediately, the cut off will be 4pm on the day before Tech/Contingency for your class is scheduled. However, co-drivers/co-riders previously registered can continue to pick up bands on Tech/Contingency days. All memberships and co-driver/co-rider/navigator registrations must still be done online.

NEW X LITE CLASS

SCORE is planning to introduce this new buggy class in the near future. Rules and general specifications are being developed now. Vehicle number range is 600-629.

LIVE STREAMING FROM ANY TEAM VEHICLE REQUIRES THAT YOU PROVIDE AN SRT FILE LINK

If your team is live streaming, a new waiver form will soon be available for you to easily submit the required information. Detailed information will be available soon.

COMING SOON

Some class descriptions are being updated to better define the rules. The 2025 Schedule of Events will be updated to provide information regarding when pre-running starts for each race.
