SAFETY BULLETIN REQUEST

The road access process involves obtaining permits from authorities, ejidos communal landholdings, and landowners. It is a very large task to secure permits for the entire Baja 500 course. Therefore, we request your cooperation to adhere to the following.

1. **Remember that the trails are open for PRE RUN activities. NOT for race speed practice!**

2. **Exercise extreme caution. There are large numbers of livestock around (and on) the trails this time of year.**

3. **As part of these cautions, it is important to properly open and close any gates you encounter along the trail.**

4. **Exercise extreme caution, show respect and patience with local traffic on the "Summit" road (RM 266 to RM 280), and particularly on the "Cordillera de Molina" access road (RM 325 to RM 332), as you will encounter slow-moving trucks transporting goods.**

This helps us maintain good relations with the landowners and authorities. And gives us the possibility that they will allow us to use these roads again in the future.

PRE-RUNNING IS A PRIVILEDGE!

Don't Ruin It for Future Racing in Baja!
